About Me

Junior Frontend Developer with hands-on experience building responsive web applications using HTML, CSS, and JavaScript. Developed real-world projects including API-based applications and task management systems. Passionate about clean UI, performance, and continuous learning. Seeking an entry-level or internship opportunity.

Skills

Language: HTML5, CSS3, JavaScript,

Tools: Git, GitHub, REST APIs

Design: Responsive Design, Basic UI/UX

Projects

Weather Dashboard – (API Integration)

- Built a dynamic weather app using a public API with real-time data
- Implemented search + LocalStorage for saving recent searches
- Tech: HTML, CSS, JavaScript
- Live Demo: coodexii.github.io/weatherDashboard-project/

Calculator Web App – (HTML, CSS, JavaScript)

- Interactive calculator with dark/light mode and error handling
- Tech: HTML, CSS, JavaScript
- Live Demo: coodexii.github.io/calculator-project/

To-Do List Web App – (HTML, CSS, JavaScript)

- Task management app (add, complete, delete) with LocalStorage
- Responsive UI with basic animations
- Tech: HTML, CSS, JavaScript
- Live Demo: coodexii.github.io/To-DO-List/
